

# Creating an Email Account on iPhone

This article will show you how to manually configure your LUS Fiber email account on an iPhone using the default IMAP protocol.

## Requirements

Before you start, you'll need the following:

- Your email address: user@lusfiber.net
- Your email password.

## Configuration for iPhones with iOS 11

1. From the Home screen, choose *Settings*

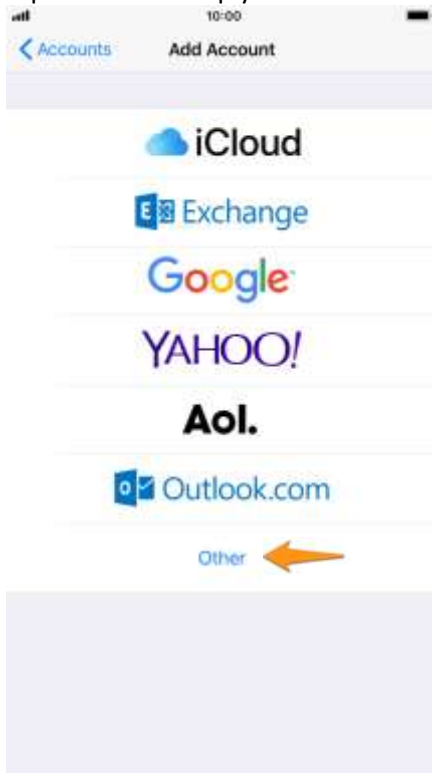

2. Next, tap *Accounts & Passwords*

3. In the Accounts & Passwords section, tap *Add Account*

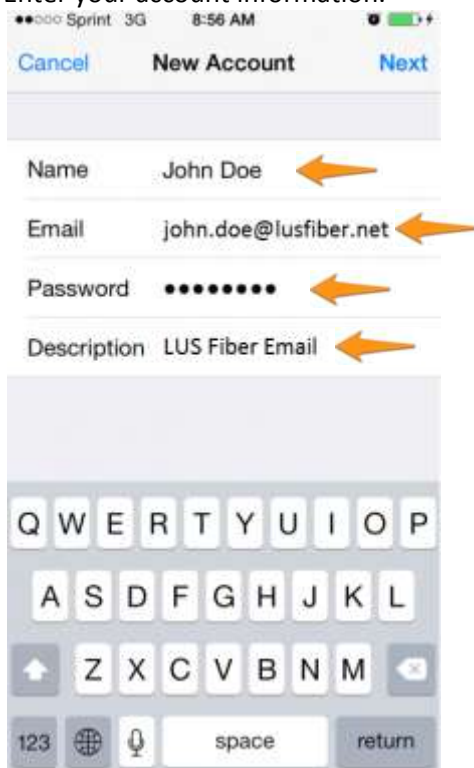

4. Tap *Other* to set up your LUS Fiber service

5. Tap *Add Mail Account* under the Mail section

6. Enter your account information.

7. On the next screen, enter your LUS Fiber account details

INCOMING MAIL SERVER

Host Name mail.lusfiber.net

User Name john.doe@lusfiber.net

Password ●●●●●●●●

OUTGOING MAIL SERVER

Host Name smtp.lusfiber.net

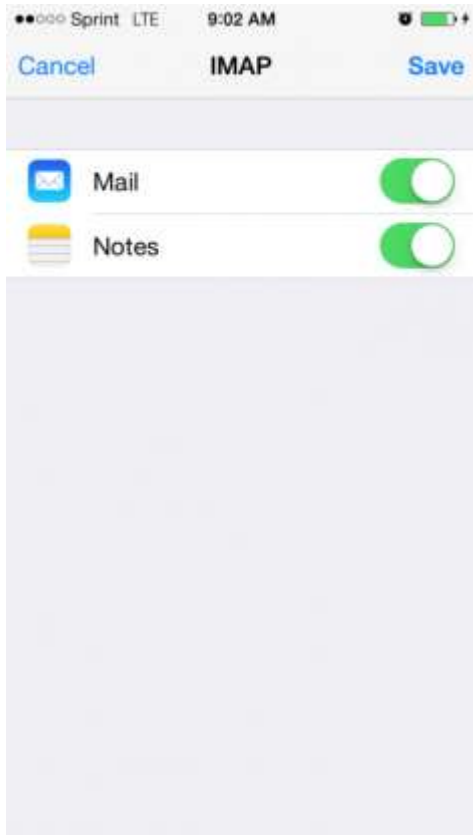

User Name john.doe@lusfiber.net

Password ●●●●●●●●

- Incoming Mail Server  
Host Name: mail.lusfiber.net  
User Name: john.doe@lusfiber.net  
Password: Your email password
- Outgoing Mail Server (SMTP)  
Host Name: smtp.lusfiber.net  
User Name: john.doe@lusfiber.net  
Password: Your email password

8. Once the email configuration is added, tap *Next* to continue

9. Choose what information you want to sync with your phone and tap *Save* to save the entered information. Your iPhone will then verify the account information.

10. Upon successful completion, you will be taken back to the Mail screen. Your account will now be listed in the Accounts section.
