

ConnecTV Includes Disability Accessible Functionality

ConnecTV now supports voice control across a range of streaming media devices including Amazon Fire TV, Android TV, and Apple TV.

Enable Voice Control

Amazon Fire TV – VoiceView

VoiceView is a screen reader for Amazon Fire TV devices. It speaks on-screen text out loud as you navigate menu options and settings on your Amazon Fire TV. You can also use VoiceView to help you set up your device. [Enable VoiceView on Amazon Fire TV.](#)

Android TV – TalkBack

TalkBack is the Android OS screen reader feature that allows users to have the operating system provide voice feedback and take voice commands for screen navigation. [Enable TalkBack on Android TV.](#)

Apple TV – VoiceOver

VoiceOver is a screen reader feature that makes it easier for those who have impaired vision to use Apple TV. [Enable VoiceOver on Apple TV.](#)

These new features are based upon the FCC's [21st Century Communications and Video Accessibility Act \(CVAA\)](#) that ensures a number of protections for people with disabilities.

Additional consumer information regarding specific requirements for TV and Internet video playback devices, set-top boxes and similar devices, exceptions to the rules, acquiring and using accessible devices and how to file a complaint with the FCC can be found at: <https://www.fcc.gov/consumers/guides/accessible-tv-and-set-top-box-controls-menus-and-program-guides>.
